

## **Application Rates – Grasses, Flowers and Plants**

### **Cool Season Grasses**

Apply 3-9 fl oz. per 1000 square feet every 7-28 days throughout growing season.

### **Warm Season Grasses**

Apply 3-9 fl oz. per 1000 square feet every 7-28 days from mid-summer to mid-fall, then every 4-5 weeks as needed.

### **Golf Greens**

Depending upon type of grass, follow recommendations for cool or warm season grasses.

### **Tees and Fairways**

Apply 3-9 fl oz. per 1000 square feet every 7-28 days throughout growing season.

### **Hydro-seeding**

Apply 12-18 fl. oz. per 1000 square feet together with hydro-seeding materials at time of seeding.

### **Ornamentals**

Apply in a dilution of 2 oz. per 1 gallon of water or 2 quarts per 100 gallons (400 ppm) of water every 7-21 days throughout the growing season.

### **Flowering Plants**

Apply foliar or in a soil drench in a dilution of 2 oz. per 1 gallon of water every 7-21 days. Spray to wet, not to run-off.

### **Potted Plants**

Water plants with a dilution of 2 oz. per 1 gallon of water every 14-28 days throughout growing period.

### **Greenhouse, Transplants**

Apply foliar or in soil drench with a dilution of 2oz. per 1 gallon water or 2 quarts (400 ppm) per 100 gallons water every 7–28 days throughout growing period.
